

Experience Summary

- ☐ I have experience of 12+ years in Software Industry.
- ☐ Adept at overseeing all phases of software development lifecycle, from design and documentation to implementation.
- ☐ Experience working in fast-paced, deadline-oriented environments.
- ☐ Strong team leader with background managing and training junior employees.
- ☐ Outstanding technical skills; able to quickly learn new concepts and technologies.
- ☐ Excellent cross-cultural understanding through interactions with clients from North and South America, Europe, and East Asia

Experience Details

Functional Domain Name	Experience	Description
Finance Domain	2 Years	Worked with TCS as an I.T. Analyst for Client - Morgan Stanley. Morgan Stanley is Global financial services firm and a market leader in securities, asset management and credit services.
Web Based Applications	7 Year 5 Months	Worked on web applications
Web Hosting	1.5 Year	Working for the Client Endurance International Group is having multiple brands in webhosting solutions like Hostgator, Domain.com, and BlueHost etc.
Automation	1 Year	Worked for the Client McAfee MOVE AntiVirus: Advanced Security Integrated with VMware NSX to Automate the test cases to validate Move antivirus functionality and policy management through epo

Technical Skills

Primary Skills

Mature

Perl Programing, Perl Mason, Perl Mojolicious, Python, Software Design knowledge, HTML, Linux, Onsite Co-ordination, Programming Fundamentals, Putty, Redhat Linux, Ubuntu Linux, CentOS, JQuery, JavaScript, Ajax, MySQL

Secondary Skills

RabbitMQ, ELK logging, ExtJs

Project Experience

Project/Product 1	McAfee MOVE AntiVirus NSXT Automaion	Apr 2021 – Mar 2022
Customer Name	McAfee	
Description	<p>McAfee MOVE AntiVirus offers the ability to integrate with network security and is included in McAfee Server Security Suite Advanced and McAfee Server Security Suite Essentials, two server security suites for comprehensive protection in physical or virtual environments, on premises, or in the cloud. McAfee MOVE AntiVirus has always delivered optimized, offloaded antivirus for VMs through its lightweight endpoint agent for multiplatform installations and agentless mode for VMware vShield, and it is enabled and certified for dynamic VMware NSX environments. McAfee MOVE AntiVirus is an established industry-leading product, protecting some of the world's largest virtualized deployments. It provides:</p> <ul style="list-style-type: none"> ■ Optimized security for virtualized environments ■ Standardized security across all major hypervisors ■ The simplest and most effective security deployment, management, and monitoring for 	

virtualized environments

McAfee® ePolicy Orchestrator® (McAfee ePO™) software, the single-pane manageability solution for all McAfee endpoint security solutions, including McAfee MOVE AntiVirus, is the window into the security of your SDDC. You can discover and import all VM workloads from VMware's vCenter into the McAfee ePO console with Cloud Workload Discovery. This also allows you to view the virtualization properties and protection status of your VMs. Using Cloud Workload Discovery, administrators can get quick insights, protect workloads through VMware NSX or VMware vShield, and view the details on the McAfee ePO console. McAfee MOVE AntiVirus Security Virtual Machines (SVMs) are deployed automatically, so there's no need to install them manually on new hosts that appear in the VMware NSX environment. The McAfee MOVE AntiVirus SVMs automatically provide antivirus protection for VMs. SVMs are managed directly by McAfee ePO software. The SVM offloads scanning of VMs, minimizing performance impact

I did test cases automation to validate the move antivirus functionality and Manage the policies using epo system

Tools & Technologies Python , Flex, VMware NSX

Operating System Windows, Linux

Role Played Python Developer

Responsibilities / Contribution

- Requirement understanding and propose the solution development.
- Involved in developing new codes that help in resolving & maintaining the overall project flow.
- Maintain the Code using GitHub
- Involved in the quality process implementations for this project.
- Involved in reviewing codes & documents as a peer reviewer.

Project/Product 2		Vdeck and HostGator	Jan 2019 – Dec 2020
Customer Name	Endurance International Group		
Description	<p>Endurance International Group is one of the world's leading provider of website hosting and design, and email marketing, it has multiple different brands which deliver the tools, technology and support small business owners. We provide support, enhancement and development to Endurance webhosting platforms like Hostgator, iPage, Domain.com and many more. Working with Mindtree a Larsen & Toubro Group Company as a Senior Consultant for the Client – Endurance International Group is one of the world's leading provider of website hosting and design, and email marketing, it has multiple different brands which deliver the tools, technology and support small business owners. We provide support, enhancement, and development to Endurance webhosting platforms like HostGator, iPage, Domain.com, Constant Contact, Homestead and many more.</p> <p>I did multiple roles for this project Initially as a Technical Lead handled the multiple team Vdeck and HostGator for the EIG webhosting products. Worked on one of the major projects IVR REST API development for the multiple brands of the Endurance. IVR Rest API is the solution which provides the connectivity between third party IVR application and webhosting platform of the Endurance. Customer can call to IVR agent and its Identification, Authentication will be handled by IVR application by getting the customer information using API calls once the customer is Identified and Authenticated application can request for further requested details for customer like the product details of the customer has purchased and his past transaction. Also Worked Product Owner for the client HostGator to get the client requirement and communicate with the client create a work backlog for the team, Sprint planning, grooming and requirement clarification for the team.</p>		

Tools & Technologies	Perl, Perl Mason, Perl Mojolicious
Operating System	Linux, Apache, MySQL
Role Played	Project Lead
Responsibilities / Contribution	<p>Managing 10 person engineering team, including hiring employees and consultants. Report directly to Project Manager.</p> <p>Preparing and presenting progress reports on a weekly basis.</p> <p>As a Technical Lead, responsible for the following:</p> <p>Requirement understanding and propose LLD for the solution development.</p> <p>Involved in developing new codes that help in resolving & maintaining the overall project flow.</p> <p>Distribute the task among the resources and manage the Scrum.</p> <p>Maintain the Code using GitHub</p> <p>Involved in the quality process implementations for this project.</p> <p>Involved in reviewing codes & documents as a peer reviewer.</p>

Project/Product 3	Citation Metrics	Feb 16 - Jun 18
Customer Name	Springer Nature	
Description	<p>Worked with Crest Primedia Solutions as Senior Software Developer for Client – Springer Nature is global publisher dedicated to providing the best possible service to the whole research community. We help authors to share their discoveries; enable researchers to find, access and understand the work of others and support librarians and institutions with innovations in technology and data. My role is as Senior Software developer to develop the solution for client as per the requirement and business needs. My Current Project is Citation Metrics this project aims to improve the quality and robustness of the citation data, by searching for DOI through various citation data sources & depositing missing DOI on Springer Link and CrossRef. I.e. find efficient / machine-based ways to improve the quality and robustness of the citation data through the methodology Cross Ref DOI linking. Crest has proposed the solution to provide the web based API. This API can be a designed to work on XML Meta data input to understand the existing references and to search DOI for the references where the DOI is not available for the citation data.</p>	
Tools & Technologies	Python, Perl, Elastic search, Logstash, and Kibana, RabbitMQ	
Operating System	Linux	
Role Played	Senior Software Developer	
Responsibilities / Contribution	<ul style="list-style-type: none"> Lead a team of 5 members on project deliverables. Effort Estimation and scheduling of project tasks. Requirement understanding and Purpose LLD for the solution development Involved in developing new codes that help in resolving & maintaining the overall project flow. Distribute the task among the resources and manage the Scrum. Maintain the Code using GitHub Involved in the quality process implementations for this project. Involved in reviewing codes & documents as a peer reviewer. Code deployment and system setup
